

Access a Smarter Approval Process

Pro-Watch® Access Management Portal

Improve Productivity with Automated Access Management

In the world of today, technology is changing the way buildings run – and it's changing your business risks and opportunities along with it. With Honeywell Pro-Watch®, our connected security management system, you can save time and money by seamlessly integrating with third-party solutions – cutting deployment, hosting, and migration costs. Honeywell Pro-Watch also helps you increase productivity through remote building control and management.

Now you can build on even more possibilities with the Honeywell Pro-Watch Access Management Portal and eliminate the hassle of processing access rights manually. Manage identities the modern way by automating your approval process – empowering you to save time and eliminate errors.

Honeywell Pro-Watch Access Management Portal

Save Time with a Smarter Approval Process

By adding the Access Management Portal module to your Pro-Watch system, you can streamline your cardholder access request process with an automated approach. With intuitive web-based interfaces for both badge holders and administrators, the Pro-Watch Access Management Portal eliminates the hassle of processing access rights manually, saves time and reduces errors.

This software solution is simple to install and configure, with no additional hardware to purchase. Administrators benefit from a customizable approval workflow and flexible request support for temporary or permanent access. The clearance code list can also be customized to address specific business needs, such as limiting areas of high security or special access requirements.

You can easily check access rights, recent activity, and pending tasks with one system. Better yet, approvers get an email notification when a status changes, so you don't have to waste time searching for status updates. It's identity management made quick and easy.

Administrator Benefits

SAVE COSTS

Benefit from a cost-effective way to manage access requests.

ENHANCE PRODUCTIVITY

Improve productivity and reduce administrator workload through web-based workflows.

MANAGE EFFECTIVELY

The dashboard provides an efficient way for approvers to view new, pending, and processed requests – and grant area access accordingly.

REDUCE ERRORS

Automated processing of access requests eliminates entry errors to help ensure compliance.

MEET STANDARDS

The module maintains auditing data on approvals and access changes to meet compliance requirements.

GET NOTIFIED

Email alerts notify approvers of new requests to keep workflow process moving.

Badge Holder Benefits

FULL CONTROL

Convenient web-based portal allows badge holders to request access changes, view their status, and recent activities at any time.

USER-FRIENDLY

Easy-to-search list of available clearance codes simplifies process and ensures greater request accuracy.

SELF-SERVICE

Improve employee satisfaction with a self-service approach to requesting and reviewing status of access rights.

Process Request

Review Request

Create Request

System Requirements

The Pro-Watch Access Management Portal module requires Pro-Watch version 4.3.5 or higher, and Pro-Watch API and HTML front end. HTML front end requires Internet Information Server (IIS). Mailing of requests and approvals requires a SMTP mail server.

Licensing

The Pro-Watch Access Management Portal is licensed separately based on the number of badge holders and system size.
